

Memorie Virtuale 4MB

Tabella delle pagine ha 2^{13} voci

$|\# \text{ frame}| = 8 \text{ bit}$

RAM = ?

Sol 1

SS ①

4MB = 2^{22} byte SIA $m=22$

QUINDI

entirezza virtuale

22 bit

SS ②

22 bit

$\Rightarrow m = 9 \text{ bit}$

SS 3

i.g. di 17 bit

$\Rightarrow$ QUINDI
 $2^{17} \text{ byte} = 128 \text{ KByte RAM}$

$$\frac{4 \text{ MB}}{2^{13}} = \frac{2^{22}}{2^{13}} = 2^9 \quad \Delta \quad \begin{array}{l} \text{DIMENSIONE} \\ \text{PAGINA} \end{array}$$

$$2^8 \cdot 2^9 = 2^{17}$$

SOL 2

PER OGNI SLOT DELLA PAGINA
MOLTIPLICO PER LA SUA DIMENSIONE
OTTENGO COSÌ LA DIMENSIONE
DELLA RAM.

continuous video 1 GB

$$\# P.V = 22 \text{ bit}$$

$$\text{continuous frames} = 20 \text{ bit}$$

$$\# \text{ frame} = ?$$

OSS

$$1 \text{ GB} = 2^{30} \text{ byte}$$
